

**When Comparing Trim and Fascia Products,
Consider Armor Coat's Distinguishing Factors:**

Two Coat Formulation for Protection from the Inside Out™

Armor Coat's proprietary, state-of-the-art two coat process far surpasses those of competitors. The Platinum Protection Package™ first coat penetrates the cellulose fiber and helps to prevent termite decay, fungal decay and mold from affecting the entire board, not just the primed surface.

Superior Warranty

Armor Coat's 20-year limited warranty is one of the best in the industry. It also features a six month warranty against mold!

Quality Manufacturing

Belco Forest Products controls the entire manufacturing and distribution process, resulting in unmatched quality control and production consistency.

Environmentally Friendly

Efficient manufacturing minimizes waste and Armor Coat's water-borne acrylic primer, with 87% less VOC's than oil-alkyd substitutes, is safe for the environment.

Available Pre-Finished Through Color Shield™

Armor Coat® Trim & Fascia products are already primed here at Belco so why not let us handle the next step as well? The only thing you need to do is tell us the color!

ARMOR COAT™
TRIM & FASCIA

Belco Forest Products leads the Northwest forest products industry by relentlessly delivering quality products and exceptional service through innovative manufacturing and a knowledgeable team of professionals who put our customers' needs first.

Located in Shelton, Washington, Belco's mission is clear – deliver quality products at a value that's difficult to match. We are a leading manufacturer and distributor of specialty building materials, including Armor Coat® Trim & Fascia, one of the highest quality primed whitewood products available, and Shelton Specialties™ Pattern Stock.

Belco Forest Products also offers an impressive array of custom services, highlighted by Color Shield™ Pre-Finish, which adds a touch of color to various wood and fiber cement sidings, trim and pattern stock and saves you time, money and hassle. We also offer custom milling and kiln drying. If another type of custom service is desired, it is likely that Belco is more than capable of fulfilling it.

There's a reason why Belco's been a mainstay in the Northwest building materials market for over 30 years and a force to be reckoned with on the National stage – we consistently exceed expectations.

ARMOR COAT™
TRIM & FASCIA

Procured and manufactured with Belco Forest Products' unrivaled standard of excellence, Armor Coat® Trim & Fascia is a premium, factory-primed, water-borne acrylic coated whitewood product. As one of the highest quality primed whitewood trim and fascia products available today, Armor Coat® provides customers with an aesthetically pleasing, safe-for-the-environment alternative to other products on the market.

Discover the Quality & Value of Armor Coat®

PROTECTION FROM THE INSIDE OUT™
Provided By Belco's Proprietary Two Coat Formulation

First Coat – Platinum Protection Package™ (Sprayed On)

- Borate solution prevents termite & fungal decay
 - Borate also acts as a diffusion mechanism, pulling the ingredients of The Platinum Protection Package™ into the cellulose fiber for total penetration
- Inhibitor solution prevents mold

Second Coat – The Primer (Flood Coat)

- State-of-the-art, water-borne acrylic primer technology
 - 6 mils wet, back brushed, oven dried, 3 mils dry
- Overall increased primer performance due to enhanced resin content

Extensive R&D Reveals Benefits of the Two Coat Process

- Applying the Platinum Protection Package™ directly to the wood fiber via spray coat, and separately from the primer, greatly enhances its efficacy. Unlike competitors who mix similar ingredients directly into their primer, thereby only protecting the primed surface, Belco adds these ingredients directly to the fiber **first**, allowing the borate to fully penetrate into the lumber and carry the other protective ingredients along for the ride
 - If mold spores are present prior to the primer being applied, even if there is borate mixed into the primer, mold will still grow through. However, with the Platinum Protection Package™, the borate and other ingredients penetrate the wood fiber, **protecting Armor Coat® from the inside out**

Industry Leading 20-Year Limited Warranty

- Unlike competing brands who warrant their products with flimsy, indirect warranties by paint manufacturers, Armor Coat's 20-Year Limited Warranty protects our customers from product deficiencies as a result of:

Manufacturing Defects

Blistering

Peeling

Cracking

Chalking

- Armor Coat® also features a six month warranty against mold

Fiber & Manufacturing

- Belco Forest Products – experts in sourcing stable fiber
 - Slow-growing, high altitude, fine grained, tight knot
- Proprietary hand-sorted selection process
 - Guarantees consistent fiber quality throughout the product line
 - Reduces costs by allowing for flexibility in fiber procurement
- Guaranteed uniform pattern on every piece with sizes and textures to meet all your needs
 - 1x2 – 1x12, 5/4x3 – 5/4x12, 2x2 – 2x12; most available 8' – 20'
 - Milled textures: comb 1 face, comb 4 sides, resaw 1 face, resaw 1 face 1 edge, smooth 4 sides

Safe for the Environment

- Armor Coat's water-borne acrylic primer is environmentally friendly
 - 87% less VOC's than oil-alkyd competitors
- Water-borne technology is less susceptible to chronic decay
 - Will not continue to pollute the atmosphere post-installation like alkyd primers
- Efficient manufacturing minimizes waste
 - Fall down is merged into other product lines
 - All excess scraps are fed to a "HOG" that reduces everything to saw dust chips which are then sold to bio-fuel manufacturers

Available in Color

- Color Shield™ Pre-Finish by Belco is fully capable of applying a factory coating to any Armor Coat® product, in any color imaginable
- All Armor Coat® products finished through Color Shield™ feature an industry leading 25-year warranty with a 15 year labor component*
 - *Only applies to exterior finished with two coats of a solid color
