

At Belco Forest Products, we pride ourselves in providing our customers with high quality products at a value that's difficult to match...

And with Color Shield™ Pre-Finish, we continue to do just that!

Whether it's siding you need painted or pattern stock you need stained, Color Shield™ by Belco will give you the look you want, when you want it, without all the work!

Why Choose Color Shield™?

Savings

Not only does Color Shield™ save you time but it saves you money!
Factory coatings cost significantly less than field applications

Quality

Controlled factory application ensures that each piece is coated consistently and uniformly

Warranties

We stand behind our work and offer warranties on all material finished through Color Shield™. Our 25/15 year warranty is the best in the market!

The Little Extras

Color matching technology allows us to get any color you can dream of.
We can also provide the matching caulk and touch up paint!

Paint Performance

Factory finishes tend to last longer as the controlled environment increases the consistency and adhesion of the coating to the substrate

Year-Round Installation Capabilities

With no weather delays for painting, you get a finished product that's ready to install any time of year

Environmentally Friendly

Only 100% acrylic paints and primers are used and the controlled factory setting limits the environmental impact

What Can Color Shield™ Do?

Fiber Cement

Fiber cement siding manufacturers offer a variety of pre-finished products, but sometimes their color choices are just not what you're looking for, leaving you to buy the paint separately and doing the job yourself.

With Color Shield™, you can pick any color imaginable and Belco will do all the work, giving you the look that you want, without all the hassle!

The Woodlands Series

Utilizing state-of-the-art coating technology, The Woodlands Series by Belco has combined the look of natural cedar with the durability and low maintenance of fiber cement siding.

Armor Coat®

Armor Coat® Trim and Fascia products are already primed here at Belco so why not let us handle the next step as well? The only thing you need to do is tell us the color!

Shelton Specialties Pattern Stock

Color Shield™ offers more than just paint. With four magnificent semi-transparent stains to choose from, Belco Forest Products can bring your Shelton Specialties Pattern Stock to the next level by adding some color.

...And So Much More!

Wood siding, shingles, panels - you name it! Even if we don't stock it, we can add some color to it!

If you have a pre-finish project and you want to save time, money and hassle, then call Belco today!
