Log-to-Log Ship Lap Pattern
with over a 6" Reveal***

At Belco Forest Products, we pride ourselves at being experts in sourcing stable fiber - slow-growing, high altitude, fine grained, tight knot. Our proprietary hand-sorted selection process allows

us to pull only the highest grade for our Shelton Specialties Log Cabin Siding, and guarantees consistent fiber quality throughout the product line. This reduces Belco's costs by allowing for flexibility in fiber procurement, and allows us to pass our savings on to you!

But Wait! There's More!

Through Color Shield, Belco's factory finish program, Shelton Specialty Log Cabin Siding is available pre-stained in one of four magnificent colors! Studies have shown that factory finishes actually cost less and last longer than field applied coatings so call Belco today and find out how you can have stained siding without the hassle!

**Unsurpassed
Quality at a
Value that's
Difficult
to Match!**
