

At Belco Forest Products, we pride ourselves at being experts in sourcing stable fiber - slow-growing, high altitude, fine grained, tight knot. Our proprietary hand-sorted selection process allows us to pull only the highest grade for our Shelton Specialties T&G, and guarantees consistent fiber quality throughout the product line. This reduces Belco's costs by allowing for flexibility in fiber procurement, and allows us to pass our savings on to you!

**2x6 Premium DF/SPF  
WC-200 T&G  
Graded for Select Deck  
Flush Back  
Lengths: 8' - 20'**

**1x6 Premium SPF  
WP-4 V4E  
Reversible:  
Resawn/Smooth  
Lengths: 8' - 20'**

Shelton Specialties T&G products are moisture infused prior to entering the kiln, ensuring consistent drying and clean patterns, while Belco's rigid manufacturing practices ensure even, well-manufactured finished products that feature sound knots and pronounced grain.

## **But Wait! There's More!**

Through Color Shield, Belco's factory finish program, all Shelton Specialties T&G products are available pre-stained in one of four magnificent colors! Studies have shown that factory finishes actually cost less and last longer than field applied coatings so call Belco today to find out how you can have stained T&G without the hassle!

**Unsurpassed  
Quality at a  
Value that's  
Difficult to  
Match!**
