

Commitment to “Clean & Green” Mold Protection

Wood Treated Right™

- As the exclusive Northwest provider of FrameGuard® treated lumber, Belco Custom Services is committed to assisting our customers in the battle to protect homes from mold, fungus decay and damage from termites.
- In order to produce the highest quality product, Belco Custom Services will only treat lumber with FrameGuard® after the raw material is inspected, ensuring it is clean and mold free.
- If our onsite FrameGuard Product Champion discovers the raw material is not up to these standards, the product will be pulled aside without treatment and the customer will then be notified of the situation.
- Belco Custom Services, a division of Belco Forest Products, is committed to a responsible marketplace.
- FrameGuard® offers homeowners peace of mind knowing they are protected from mold, fungus decay and termites.

With these goals in mind, Belco Custom Services implemented a “Clean and Green” policy with all FrameGuard® treated lumber.
